

Features:

- BOTTOM DP and COMMA
- Grey face colour, White segment colour
- Fast reliable interconnection and mounting system without the need for a PCB
- Unique interlocking facility for accurate positioning of adjacent displays

- Position of the interlock common across the full range so that different digit sizes can be used within the same display
- Interlock dovetails have a light friction fit between units for ease of assembly
- Single font style across the full range (6 character heights available)
- Wide viewing angle
